Home Motion Cinema MOVES Main Stream! Starting Under \$5,000!

SCOTT JOCHIM

If you thought raising the volume on your subwoofer would give you the feeling of touch then you might as well continue to look at your black and white TV. If you really want to FEEL, then imagine finally bringing a Disney attraction home with you and sticking what was once millions of dollars in motion technology under your couch or under your favorite chair. This new motion technology and the convergence of coded DVD's titles has come to the masses and its time that you see and now feel the future of home entertainment.

I've partnered with the best firms in the field of electronics, engineering and software development and can now offer what I feel is the best motion cinema hardware and software in the world.

These motion platforms are perfectly synchronized with every second of over 650+ movies and TV's shows and every month new titles are added. Every moment that *King Kong* is stomping through the forest it feels as if you are trembling on the ground below. The depth charges exploding in *U-571* will get your heart racing as they detonate right under your chair. Then just as the *Fantastic Four's* Human Torch fly's through the city, your couch moves left to right,

forward and back giving you the sensation of flying through the city and *on fire no less*. Imagine swimming and diving under the ocean in *Finding Nemo* where even the animation of the latest movies come to life. So get ready to share the same forces (up to 2 g's) and sensations of floating, swimming, dancing, racing, flying, falling, jumping, whirling, smashing, hitting, crashing, diving, running, tumbling ... OK, OK you get the point.

Here's just a few of the 650 movies waiting to *move* you...

SLEEPY HOLLOW SOLDIER SNATCH SPACE COWBOYS SPACE JAM SPAWN SPEED SPHERE SPIDER-MAN SPIRITED AWAY SPY GAMES SPY KIDS THE TERMINATOR	TERMINATOR 3 THE TEXAS CHAINSAW MASSACRE THEY THIRTEEN DAYS THOMAS CROWN AFFAIR PEARL HARBOUR PERFECT STORM PETER PAN THE PIANIST PIRATES OF THE	CARIBBEAN PITCH BLACK INSOMNIA THE IRON GIANT I-SPY THE ITALIAN JOB JIMMY NEUTRON JOY RIDE JUMANJI JURASSIC PARK 1 JURASSIC PARK 2 JURASSIC PARK K-19	PHONE BOOTH PLANET OF THE APES PREDATOR RED DRAGON RED PLANET REIGN OF FIRE (2002) RESERVOIR DOGS RESIDENT EVIL RESIDENT EVIL :APOCALYPSE THE RING

This month I reviewed the latest and most advanced seating options and motion cinema products on the market. The following three tiers of choices represent the various options available to you as a consumer or commercial user. Take note Disney and Vegas that once Motion Cinema is in the home you will have to come up with Holodeck to keep up!

## Motion Seating Models and Prices

### Entry Level System: \$3,999

2 Axis Universal Motion Platform gives you the ability to add motion to almost any single seat chair or recliner that you have. As this is the entry model and only features 2 Axis (pitch and roll) it still gives you a

feeling of movement and involvement in every movie. Unless you like moving the recliner's handle back and forth for your movement this is a great way to bring motion home. The feature on this model that really sticks out is the fact that you can place this unit under your favorite chair or recliner. This allows you not to have to buy extra furniture or change a room's seating configuration. Just slip this 2 axis platform under your chair and plug it in to the nearest outlet. Then connect the Cat 5 cable to your motion control set top box and start enjoying... but make sure to have your cup half full or you will soon see it half empty on the first turn on *Days of Thunder* or *Top Gun*!

### Entry Level System

### Premier: \$9,500-\$15,000

Choose a 2 or 3 Axis electric reclining (2 stage Leggett & Platt) Love Seat that comes in 8 luxurious choices of top quality leather and built on a frame of 13 ply European hardwood. This system is turn key and ready right out of the box with or without cup holders. The couch also reclines with a

push of a button so the system is not only a gorgeous piece of furniture but also hides all the electronics inside the couch hidden from view. All you have to do is plug it in and you are ready to move in style. Let your friends sit in your new comfy couch and ask you where you found the seating. Put in the movie and watch as your home becomes a favorite place to hang out on Saturday night. You will have to sell tickets to your family and friends just so that you can buy another couch!

### Premier System

### Ultimate: \$15,000-\$20,000

This 3 axis platform with actual High Back Theater Seating is for those who want a cinema experience to look and feel like a real theater and also move you like you are actually in the movies. With a total of 3 seats on each platform and a ton of choices in color and texture this configuration can make a room feel like an actual cinema that would impress any design guru or theater buff.

### Ultimate System

So, sit back and hold on for the home theater experience of a lifetime ... or for at least the next 900 hours of current content ... I also better call for delivery because I will be watching movies for the next few weeks ... hmmm what's next ... *The Matrix* Trilogy..., maybe all *The Lost TV* episodes ... or the good standby... *Jurassic Park*!
