NEW FOR 2008

VRDL PC Pro - Virtual Tour Authoring Application

VRDL PC-Pro (Codename: "Vista") is undoubtedly the most complete software for creating professional virtual tours for the Internet, CD-Rom and Presentations. SHOW 2 offers you the widest range of features available in the market, presented in an easy and visual way. Vista 3D SHOW 2 is the right tool for both newbies and techies alike. No more additional fees or per tour fees... just buy the software and create as many tours as you need for as long as you wish.

Thanks to the wizard assistant you won't need any technical knowledge to obtain impressive results in just a few minutes. With the "What you see is what you get" interface of SHOW 2, you can forget about tedious menus and a lot of overwhelming options. Those who have experience with virtual tour software will be impressed by SHOW 2 and the extensive range of options it includes.

PC Pro - Features

- ◆ Windows-based.
- ◆ Single Application Authoring.
- ◆ Easy to Learn and Use.

PC Software: D Vista FloorPlan

3DVista FloorPlan Maker

Stunning 2D and 3D Floor Plans in minutes

Are you still obligated to use ugly white floorplans for your presentations? Tired of having your quality virtual tours and brochures look unprofessional because of plain plans? Fed up with spending a lot of money on a designer to create floor plans for you? What if in only 5 short minutes you could create for yourself a beautiful floorplan?

We realize that if you want to have a top quality virtual tour then you should be able to include beautiful professional floorplans in both 2D and/or 3D.

It is no longer necessary to hire the services of an expensive 3D designer or architect to create an impressive floorplan. We have finally developed a powerful yet easy to use application for anyone to create fabulous floorplans in both 2D and 3D.

No special designing or tech skills are needed because the extensive library of textures and models of furniture included in 3D Floorplan Maker and its intuitive "drag and drop" system, allow you to create stunning plans in minutes. Wood, marble, stone, tiles... just select the texture you prefer for your floors and walls. Then, just add any piece of furniture from the hundreds of models included in the program. Need some lights? Just place them anywhere you wish to create your preferred ambience.

3D Floor Plan Maker also includes a 3D engine that allows you to rotate your plan from any angle and zoom it to the level that you desire. Once you are satisfied, simply export it as an image and include it into your virtual tours using 3DVista SHOW or use it for printing purposes.
